# Kansas: Protecting America's Dinner Table

With its deep agricultural heritage and expertise, Kansas has been selected as one of six finalists for a \$451-million federal research lab designed to protect the nation's food supply and agriculture economy.

**Kansas is uniquely positioned to fulfill this urgent mission – on the merits.**

- Kansas is a renowned leader in animal-health research and development, with a remarkable concentration of both academic and industrial assets.
- Kansas offers world-class academic and research talent.
- Kansas offers an unbeatable site for new research at Kansas State University, home of the state-of-the-art Biosecurity Research Institute.
- Kansas is the gold standard in preparedness for conducting research safely and securely.
- Kansas offers strong and unified public- and private-sector support.
